

Conveyable Media Display

join > influence > benefit

Finally, anyone can afford to own a “Jumbotron”. The CMD is the first affordable, large format, high resolution, all- weather Media Display to offer take-anywhere portability, fast simple setup and operation - Inside or Outdoors

Daytime OR Nighttime

- * The only system of it's type works in all weather or lighting conditions
- * Large 137" diagonal screen viewable from over 100 yards away
- * Can be equipped for full daylight use
- * Can be equipped with powerful long-throw sound system
- * Can be equipped for fully self-contained operations
- * Can be equipped with remotely updateable intelligent media player
- * Can be equipped as street legal trailer for towing behind vehicle

Acquire for far less than what a similar size LED screen alone would cost plus the CMD is higher resolution and includes stand, trailer and media player. Investment ranges from \$34,995 to \$60,000 depending on options like generator, sound, daylight use projector, etc.

Capture Attention and Aid Retention with the Conveyable Media Display from Influence Media Network

New tool provides competitive edge for your athletic programs through improved training while enhancing the game experience for audience, messaging to patrons, and generating new revenue stream from advertisers and sponsors.

You can take this system out on the football, baseball, soccer, or track field or in the gym to break-down last week's game or prepare for the upcoming opponent. Tape practice and after telling athletes what to do, spend some time showing them what they actually did in life size slow motion.

Instill a sense of pride in your facilities without breaking the bank with our cost-effective "jumbotron" solution. You don't have to spend six figures to have a high definition display that rivals the size and brightness of systems costing hundreds of thousands or even millions.

Communicate vital information to your patrons while you have them at events through digital messaging.

Easily raise tens of thousands of dollars annually through advertising and sponsorship. Not only can your school have the system paid for but it can contribute tens of thousands of dollars annually to your bottom line.

Let's look at how this system can benefit your program in a typical week.

- 1 Setup is EASY! Tow display to location.

- 2 Raise screen.

- 3 Start generator or plug in.

- 4 Power on projector and sound.

The Conveyable Media Display At Work in High School Athletics

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY
<p>AM</p> <p>Elementary School assembly in cafeteria has a special program with a visiting speaker that includes video. They use the system where it was not possible before due to the windows surrounding the cafeteria. It is quick and easy to tow from fieldhouse to elementary building with golf cart then easy to roll in and setup indoors.</p>	<p>AM</p> <p>Volleyball team uses the system during practice by filming setting, dig, and kill drills, then reviewing in life size slow motion.</p>	<p>AM</p> <p>Dance Team prepares for upcoming football game by reviewing tape of last Friday's performance, filming rehearsal, then reviewing in life-size slow motion.</p>	<p>AM</p> <p>Cheerleading team prepares for upcoming football game by reviewing tape of last Friday's routines, filming practice, then reviewing in life-size slow motion with sound.</p>	<p>AM</p> <p>Band prepares for tonight's performance by filming practice then reviewing in life size slow motion with sound.</p>	<p>AM</p> <p>PTA uses system during Fall Festival to communicate PTA messages and run festival sponsor ads.</p>	<p>AM</p> <p>(no schedule)</p>
<p>PM</p> <p>Football team takes on field to break down film from last Friday night's victory. Emphasize what you did right with life size slow motion and point out areas players can still improve. Being able to use it right on the field in all weather including full sunlight on a screen large enough the entire team can see is a huge benefit by shortening the time between showing athletes something then putting it in practice.</p>	<p>PM</p> <p>Football team takes on field and films blocking, tackling, and passing drills, then reviewing in life size slow motion right on the field.</p>	<p>PM</p> <p>Football team begins preparation for Friday's game by watching scouting film of opponent. Coaches discuss strategy during film and freeze or slow down as appropriate.</p>	<p>PM</p> <p>Football team Offensive and Defensive coordinators prepare for tomorrow's game by filming practice then reviewing with skill players in life size slow motion.</p>	<p>PM</p> <p>System runs sponsor ads wrapped with student athlete / cheer / band / dance profiles and school messages and announcements prior to game. During game system runs live video wrapped by sponsor ads. At halftime runs game sponsor video, school announcements, and sponsored student athlete of the week profile.</p>	<p>PM</p> <p>Class of 2000 uses system during class reunion to run slide show.</p>	<p>PM</p> <p>Booster Club uses system during meeting to show advertiser content to prospective advertisers they are seeking 2011 sponsorship from and to highlight value of advertising on the system.</p>
