

Capture Attention and Aid Retention with the Conveyable Media Display from Influence Media Network

New tool provides ability to use rich media in outreach programs outside the church whether at satellite locations or even outdoor events.

You can take this system out to block parties, satellite church locations, community events, tailgate parties for local schools or colleges, anywhere people gather.

You don't have to spend six figures to have a high definition display that rivals the size and brightness of systems costing hundreds of thousands or even millions and it is portable and fast and easy for volunteers to use.

Communicate vital information to your members at special events through digital messaging.

Let's look at how this system can benefit your program in a typical week.

- 1 Setup is EASY! Tow display to location.

- 2 Raise screen.

- 3 Start generator or plug in.

- 4 Power on projector and sound.
